

FANCOIL HOSES / FLEXIBLE METAL BRAIDED–NON BRAIDED INSULATED –UNINSULATED

AzurFH is a brand new product which both prevents the probable problems by the rigid connections and brings about total economical solution in many HVAC applications

AzurFH flexible metal hose can be easily used in the food processing facilities, shipyards and petrochemical plants as well as HVAC applications.

Flexible structure of AzurFH makes it unnecessary to use additional fitting elements in the your systems.

Specially designed and developed welding technology of AzurFH flexible hoses impedes the potential corrosion due to the condensation in the conventional connection joints.

Since AzurFH flexible hoses can be produced in the demanded length it rules out any standard limitations due to the site requirements

Pressure Rating: PN2,5/PN40

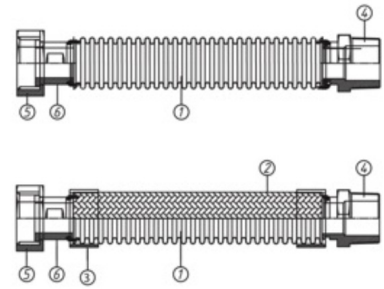

Hose: Stainless Steel

Nipple, Union: Carbon steel / Stainless steel (Optional)

Nipple x union (other connections (Optional)

Description	Size	Maximum Working Pressure
Unbraided Fan Coil Hose	1/2"	10 bar
	3/4"	10 bar
	1"	6 bar
	1 1/4"	4 bar
	1 1/2"	3 bar
	2"	2,5 bar
Braided Fan Coil Hose	1/2"	40 bar
	3/4"	40 bar
	1"	40 bar
	1 1/4"	25 bar
	1 1/2"	25 bar
	2"	25 bar

SPRINKLER HOSES / BRAIDED -NON BRAIDED FLEXIBLE METAL HOSES

Sprinkler type fire extinguishing systems are special systems which are automatically activated when the fire breaks out and eventually extinguish it.

Sprinkler type fire extinguishing systems have recently become mandatory to use in buildings like malls, theatres, hospitals and hotels where great numbers of people gather together
